The Legislature is thought to depend on the re-

solt in Leon and Wakulla. (Leon is Whig, but Wakulla is Loco.) One letter claims the Joint Ballot as probably Whig by a decided, the other by a small majority.-We have had to modify the tonof our correspondent somewhat, for we cannot yet believe the return of two Whig U. S. Senators from Florida probable. It is glory enough for one day to know that our friends in the new State have made so noble a struggle. Room in the ranks and three cheers for the gallant Whigs of FLORIDA! The Rochester Daily Advertiser, in the course

of a column of blind staggers on the subject of Protection, expresses a hope 'jhat the public mind will be disabused of its faith is placety of legislation to afford high prices for manufactured articles."

We have great pleasure in assuring the Editor that the consummation he desires is much nearer than he seems to hope. For years past, we (with hundreds of others) have been piling demonstration on demonstration-not merely by arguments but be unanswerable facts of the indubitable truth, the Protective legislation does NOT tend to enhance the prices of Manufactures, but to reduce them. Over and over have we shown, in refutation of the ever repeated fallacies of the Evening Post, Journal merce. &c. that Protection has reduced th prices of Edge Tools, Glass, Nails, Screws, Pins. sed Sugars, &c. &c .- in short, of every fabri on which it has been allowed fairly to operate And now, in the middle of 1845, the Rocheste Daily announces this thread bare Protective truth as if it were a Free Trade axiom or an original dis covery !

The American Republican, in the course of a bad-tempered article on the late 'Native' defeat in our City School Elections, raves as follows:

"The only issue was whether the American youth is our public schools should have the daily use of the Bibi-without note or comment, or whether they should be de-prived of it altogether. The result of the election has vir-tually, if the officers elect act up to their constructive in structions, deprived them of the use of it."

Although we make liberal allowance for the exu berance of partisan rhetoric, especially during the agonies of defeat, we cannot permit this to pass unrebuked. Does any man believe that there is any priving the children in our Public Schools of the Bible! Has any such Has any such proscription ever been proposed or advocated by any human being? Have not the advocates of the New Schools always bee most willing and anxious that those who desired the rending by their children of the Received Ver sion of the Scriptures in Schools should be suited Has not the main question ever been, not with regard to these, but "Shall those who think differen ly-who condemn the English Version, or who do not approve of the use of the Bible as a school book. also be suited !" Conceding it right that the Bibl should be read, is it so right that dissent from it is not allowable! Has not this been the real question

NORWICH CITY ELECTION.-John Breed, (Whig) was on Monday elected Mayor of Norwich, Ct.; the Loco-Focos combining on personal grounds with portion of the Whigs to elect him in place of the regular Whig candidate. The Loco-Foco ticket proper received 5 votes.

Philip S. Galpin (Whig) has been elected Mayor of New Haven, Conn. over Henry Peck (also Whig) by a majority of 6. For Galpin 337; for Peck 325 ; scattering 6.

JOHN P. GAINES, of Boone Co. is the White te for Congress in the VIIIth (Tippecanoe District of Indiana, against John Pettit, the Foco incumbent. That District gave 7,842 votes for Polk to 7,028 for Clay last Fall-every County but Warren giving Polk a majority-and yet we enter tain high hopes of Gaines's election.

REV. J. H. FAIRCHILD.-During a recent journey, we read rather carefully portions of a thick pamphlet just published in Boston, entitled "Truth Revealed—Statement and Review of the Whole Case of the Rev. J. H. Fairchild, Compiled from Original Documents, by a Member of the Suffolk Bar," (pp. 104 & 70.) This is "The Descons' Statement," and it certainly makes out a very strong case for them and rather a dark one for Mr. Fairchild. We see not now any one of a hundred facts developed in this pamphlet can be reconciled with the theory of Mr. Fairchild's innocence.—The pamphlet is neatly published by Dudley & Hailburton. What it had affirmed, as a matter of most glaring notoriety, was that the prices of certain staples, largely bought and consumed by our Farmers, are much higher than they would sow be under a Revenue Tariff. This we could now be under a Revenue Tariff. This we had questioned, and asked the Post to prove it by an appeal to Price Currents. It would be very easily done, if (as Carlyle would say) it were "double" at all-the only hardship in the case is that the facts upset the Post's assumptions.
